### FORMSPRO FORM

### **No Coding Required:**

FS UTHORIZED

HANNEL

The Form and Report Builder in FormsPro provides a user-friendly interface that allows anyone, regardless of their technical background, to create, manage, and easily deploy smart digital forms. This simplifies the form creation process, lowers IT resource dependency and allows your team to focus on more critical tasks.

## **Conditional Logic:**

Conditional logic streamlines and provides the opportunity to consolidate forms by dynamically displaying or hiding fields based on user input. This feature ensures that users only see relevant fields, reducing form complexity and improving the overall user experience.

## **Custom Workflow and Processes:**

Create forms tailored to your organization's specific workflow and processes. This enables your team to automate the review, edit and approval of specific forms during the submission process leading to increased accuracy, efficiency and lowering of administrative support time.

### **Data Sharing:**

Maintain IFS Solutions as the system of record for data by automatically populating forms from IFS back-office and mobile solutions. Submitted form data, reports and images are also maintained in IFS solutions.

## **Powerful Reporting:**

FormsPro built-in Advanced Reports provides robust reporting capabilities, giving your organization the ability to create one-to-many reports from a single form submission. Create customer facing, internal, and external reports for all your reporting needs.

#### **Enterprise Features:**

- Single Sign On (SSO)
- Integration Mapping
- Data Validations
- Multi-Environment / Form Deployment
- Version Control

# By enhancing your IFS Cloud or IFS FSM solution with FormsPro, your organization can benefit from:

# Digital Forms Transformation:

The mobile forms platform provides a solution to address your simple to complex forms needs across your organization.

# FormsPro for IFS Cloud or IFS FSM:

Designed to integrate with your IFS back-office and mobile solutions.

# **Rapid Time to Value:**

As a cloud solution, access and create forms today and deploy an integrated solution with your IFS solutions in months.

## **Increase Efficiency:**

Create forms and workflows to streamline your processes, and decrease time for consistent data capture by your team.

## **Cost Savings:**

The no-coding-required mobile forms platform allows you to create and manage forms and lower your IT or specialized developer needs.

The combination of IFS Cloud or IFS FSM and FormsPro is a powerful solution for organizations looking to enhance their IFS capabilities. With its range of advanced features and benefits, FormsPro can help your business optimize workflow processes, improve collaboration, and make data-driven decisions. Invest in FormsPro today and unlock the full potential of your IFS Cloud or IFS FSM platform.
